OBJECTIVE

Looking for an opportunity where I can utilize my creative skills to develop responsive webapps with an excellent backend logic in-line with the project workflow as well as developing user friendly front end to enhance the user experience.

PROJECTS

CORE-PHP, AJAX, JQUERY, MYSQL, BOOTSRAP

TAILORTAG FACTORY, OUTLET & E-COMMERCE MANAGEMENT, FULL-FLEDGE REQUIREMENT & SITUATION BASED SOFTWARE

Tailortag is the Clothing brand having a factory to produce clothing items. Their main requirement was when customer gives them size and measurements it should be reusable for future for the customer be saved in the customers' size database so that customer can easily create order next time without filling relevant size form. The other main focus was when an order gets created, it should be visible in the factory panel so that they can update the status of the order to the customer according to the stitching phase. The other focus was to manage the stock of fabric whenever the order gets created and to give daily, monthly orders, sizes, fabric stock, Cash and stock cost reports

CORE-PHP, AJAX, JQUERY, MYSQL, BOOTSRAP

CALL CENTER AGENCY SOFTWARE, AGENT ORDERS MANAGEMENT SOFTWARE

Their requirement was to make ease for agents to take orders from customers by giving them an Order taking form instead of using excel sheets for their work. This form uses automated phone number format validation according to Saudi and UAE format. Company's Owner wanted a panel where he can track the number of orders of specific agents, teams and agencies to give them target of daily orders. Also, an order's report page where he can filter order team wise, date wise, agent wise and download them in excel format to keep record of them.

CORE-PHP, MYSQL, BOOTSRAP

DO DESIRED WORLD FOUNDATION,

CHARITY, DONATION AND ORGANIZATIONAL PUBLIC CHARITY CAMPAIGNS & EVENT MANAGEMENT WEBSITE

This organization is working for helping needy & poor people and wanted a website to run campaigns in which people can share or donate via selecting ration items in that specific campaign provided by admin through their website. Campaigns are controlled by alumni, 2 volunteers and companies which are linked with those domains. They can login and post events with duration to be held on website and campaigns. This organization needed to manage alumni, volunteers and the companies which are working with them and to manage all of the things related to ration donation via admin side

CORE-PHP, JQUERY, BOOTSRAP

BULK E-MAIL PHONE EXTRACTOR,

FETCH (EMAIL & PHONE#) DATA FROM GOOGLE SEARCH RESULTS PAGE

Their requirement was to develop a scrapper that works like when you search for something, it should go search on search engine and fetch all of the phone numbers, emails and links being listed in every link. So that they can get all results in the form of table and export a CSV from it for further use.

CORE-PHP, MYSQL, BOOTSRAP

PRODUCT LINKS & ORDER MANAGEMENT,

CALL CENTER & AGENCY'S SPECIFIED LINK MANAGEMENT SOFTWARE

A company has been linked with different agencies and every agency has been assigned with some (Single product) links which are Addon domains. Every agency has a portal by which they can manage the product being displayed on that link and to manage the orders getting from that link. These product links are add-on links and connected to single NameServer. Every link has been linked with Facebook pixel and every agency has right to change pixel code of that link through their agency panel. And admin has right to assign & unassign links to any agency and to add more products and to show it on any add-on domain.
